

Are you a health professional wanting to increase your qualifications?

Here is an exciting opportunity to gain an internationally recognised postgraduate degree while studying with four of Victoria's leading universities.

Public Health is the combination of humanities and science that provides the knowledge, skills and practices to protect, promote and restore population health. A postgraduate degree in public health is highly relevant to the professional development and continuing education of a broad range of health professions.

The **Master of Public Health** course provides graduates with the knowledge and skills necessary to conduct public health research; develop, analyse and implement policy; and to plan and evaluate health services and programs.

Study full-time or part-time.

COME TO OUR INFORMATION NIGHT

Wednesday 4th November 2009 6:30pm – 8:30pm (supper will be provided)

The University of Melbourne's Parkville campus.

Starting in Lecture Theatre 1, Basement, 207 Bouverie Street, Parkville
